

Health & safety in employment is not just the right thing to do. It is a way to maximise the effectiveness of your organisation because it:

- creates a culture where your staff feel valued and contribute more
- ensures compliance with health and safety legislation
- will reduce absenteeism and may improve retention of key staff
- Will boost your brand reputation with customers- or at least protect it from harm

The ISAW toolkit provides you with learning about how to improve the safety of your workforce, a measure of how well you support safety now and the means to improve in the future. Along the way it will generate evidence that will protect your reputation and provide evidence in case of legal challenges

Who is this for?

- Employers
- HR Departments
- Commercial lawyers
- Health & safety Consultancies

Value added features:

- ✓ Capability model measuring health & safety in 30 areas
- ✓ Online learning for health & safety in 30 areas
