PROPI
An online toolkit for PROtecting Personal Information

The 2018 UK Data Protection Act is the legislation which brings into law the GDPR regulations. It brings with it more stringent demands on organisations along with stiffer penalties.

Our online toolkit provides two levels of online learning for users of personal information and managers responsible for organisational compliance with a capability model to assess your level of compliance. The training for managers has 10 modules: principles and lawful processing; consent; special categories; transparency; respecting data subject rights; data controllers and data processors; security of personal data; proactive data protection; remedies, liability and penalties; transfers of personal data to third countries or international organisations;

Who is this for?
- Businesses
